INDEX.

A.

Academy of Sciences at Munich, 383
Academy of Sciences at Stockholm, 387
Actynolite from various places, 54
Africa, Northern, Geological Notices in, 32
Allen, J. A. Mr. on luminous appearances in the Atmosphere, 341
Allen, Wm. Rev. on the Curves of Trisection, 343
American Geological Society, 191
Analysis of Sulphuret of Molybdena, 320
Chromat of Iron, 321
Sulphat of Strontian of Lake Erie, 324
Barytes of Berlin, &c. 325
Andrews, Elisha D. Rev. his discovery of Fluor Spar in Putney, Vermont, 188
Animals, traits of their history, 309
Anthracite, account of the mines of, at Wilkesbarre, Penn. 1
accompanying rocks and minerals, account of, 5
quantity of, consumed on the Susquehannah, 1
Anthracite at Wilkesbarre, description of, 7
Antony's nose on Lake George, hæmatite in, 47
Arsenic, on tests for the discovery of, 155
Art, Lithographic, notice of, 169
Astronomy, 386
Atlantic, currents of, 390

B.

Banezzi, Stefano M. his method of detaching painting in Fresco, 384
Barnet & Doolittle, their Lithographic Establishment, 169
Barton D. W. Mr. his notice of the Geology and Mineralogy of the Catskills, 249—on the Virginia Fluor Spar, 277
Barytes, Sulphate of analysed, 325—from Berlin, 325—Missouri, 327—Southampton, 227
Barytes and Strontites, tests for, 372
Basanite, 43
Beck, T. R. Doct. his meterological table, 333
Benevolent exertion, 388
Berlinghieri, Andrea Vaccea M. his method of performing the operation of Esophagotomy, 383
Beryl, new locality of, 39
Bigsby, John I. Doct. his letter on the Strontian of Lake Erie, 280
Bite of the Rattle-snake, cure for, 189
Black oxide of Manganese, 189
Blowpipe, new, by Prof. Green, 164
Blue-bird, 310
Bonnets, Italian, manufacture of, 166
Botanical items, communicated by Doct. Torrey, 200.

Bowen, G. T. Mr. his analysis of sulphat of Strontian, &c. 324
Brace, John P. Mr. his list of plants in Litchfield and its vicinity, 292
Brongniart, Alexander, Mr. letter to, 3—his notice on vegetable fossils which traverse the layers of coal formations, 266—his researches on organized remains, 395
Brownell, Bishop, his notice of Fluor spar, 43
Buckland, Professor, his opinion of American Geology, 185

C.

Calculi animal, 150
Canals, navigable, memoir on, 102
Cannon balls, their conversion into plumbago, 178
Caraïbes, Insects, 195
Caterpillars, 393
Catskills, storm at July 21st, 1821, 125
Cavern in lime stone, 41
Chlorite, crystallized, 54
Chlorite, foliated, 276
Chlorophœite, 245
Chromate of Iron, 53
Chrysoberyl, new locality of, 37
Cist, Zachariah, Mr. his account of the mines of Anthracite at Wilkesbarre, Penn. 1—of the Manganese of Wilkesbarre, 38
Coffee, consumption of, 393
College of Chios, 196
Comstock, J. L. Doct. on the Aphlogistic Lamp, 328
Comptonite, a new mineral, 28
Concretions in a parrot, examination of, 152—from a bullock's tongue, 153
Cooper, Thomas, President, on tests for arsenic, 155—on volcanoes, 205
Cotton grows in New-Jersey, 86
Criminal Jurisprudence of Paris, for 1817, 1818 and 1819, 386
Cure for the bite of the Rattle-snake, 189
Cuvier, Baron, his work on the fossil bones of Quadrupeds, 393

D.

Dana, Prof. his chemical examination of animal products, 149
Dearborn, H. A. S. Mr. on a natural ice-house at Williamstown, 331
Dekay, James D. Doct. on pennatule fléche, 87
Delafield, Major, his notice of the Strontian of Lake Erie, 279
his geological remarks on the Lake regions, 282
Delalande, M. his collection of natural curiosities from the Cape of Good Hope, 381, 382
Denny, H. W. Mr. on the cause of Goitre, 339

Dewey, Prof. his miscellaneous notices on American Mineralogy and Geology, 274
Diamond Point, crystals and minerals of, 45
Dolcoath Mine, 372
Doolittle, his translation of Mr. Girard's memoir on navigable canals, 102
Douglass D. B. Prof. on the plants of the North-west, 56—his letter on the cure of the Rattle-snake bite, 189
Drowning, recovery of persons from, 393
Dwight, Benjamin W. Doct. his account of a storm at Catskill, 125

E.

Eagle, bald, 89
Earthquake at Kutch, 315
Eaton, Prof. his geological survey of Rensselaer county, state of New-York, 189
Editor, his letter on the galvanic Deflagrator, 201—his miscellaneous notices in mineralogy, &c. 40—his notice of natural Ice-houses, 174—of the conversion of cannon balls into Plumbago, 178
Elephant, death of, 393
Eliot, Jared, Rev. notice of, 357—Letters of Dr. Franklin to him, 357
Engine, steam, alternating, 90
Environs of Paris, mineral geography of, 394
Esophagotomy, a new method of performing the operation of, 383

F.

Facts, practical, relating to the Wilkesbarre, coal, 7—16
Feldspar of Saratoga, 37
Feldspar and Epidote on the shores of Lake George, 47
Fluor spar of Bennington, 43—near Providence, 50—in Tennessee, 51—new locality of, at Putney, Vermont, 188—of Virginia, 277
Foot, Lyman, Doct. his notices on Geology and Mineralogy, 35
Fossil Elk of Ireland, discovery of, in the Isle of Man, 246
Fossil shells, new elementary work on, by Mr. Brongniart, 395
Fossil tree of the river Des Plaines, Mr. Schoolcraft on, 285
Fossil vegetable, notice on, 266
France, natural history in, 381
Franklin, Doct. letters of, 357—his notices of agriculture, 359—his ideas of springs, 362—his geological notices, 363—his remarks on retaliatory laws, 363—on the north-east storms, 364—on copper mines, 365—on the love of praise, 366
French voyage of discovery, notice of, 390
Fringilla Tristis, 310

G.

Galvanism effectual in cholera Morbus, 386
Garnet, remarkable mass of, 55
Gas, capacity of, for caloric, 372
Gasometer, improved, of Doct. Hare, 312
Geneva Museum, 199
Geology, American, opinion of Professor Buckland on, 185
Geology of the Catskills, notice on, 249
Geological remarks on the Lake regions, 282
Geological Society, American, 191
Geological survey of the country of Rensselaer, 189
Girard, M. P. S. Mr. his memoir on navigable canals, 102
Girard, Doct. of Lyons, his remedy for drunkenness, 385
Goitre, on the cause of, 339
Goonong-Api, eruptions of the volcanoes of, 375
Granite, notice regarding the working and polishing of, 246
Green, Jacob, Prof. on cotton, 86—on the bald eagle, 89—on animals, 309—theory, concerning, 311—letter from, 896—his new blow-pipe, 164
Griscom, Prof. his communications, 370
Gypsum, crystallized, of Ohio, 51—of Virginia, 52—of Hudson, 52

H.

Hall, Prof. his notice of iron mines and manufactures in Vermont, and some localities of Earthy minerals, 23
Hare, Robert, Prof. his letter on the cause of heat, 142—letter to him on his Deflagrator—201—his improved Gasometer, 312
Hayden, H. W. Mr. on Tennessee fluor spar, 51
Hitchcock, Edward, Rev. his meteorological journal kept at Deerfield, 383
Hoboken, serpentine rocks of, 16
Hæmatite of Lake George, 47
Hog, anecdote of, 309
Hosack, Doct. his letter to Prof. Green, 397
Hospital at Hamburgh, 195
Hudson, geological notices respecting, 33
Hydrophobia, 385

I.

Ice-house, natural, at Meriden, Conn. 175
at Williamstown, Mass. 331
Iceland, 370
Impressions, vegetable, at Wilkesbarre, 6
Iron, magnetic, of Crown point, 48—Micaceous of Mass. 58
Iron mines and manufactures in Vermont, notice of, 23
Island of St. Michael and its geological structure, notice of, 251

Italian bonnets, manufacture of, 166
Ives, Thomas, Mr. on a natural Ice-house, 332

J.

Jaundice, use of phosphoric acid in, 162
Jenkins, John T. Mr. his notices of the geology of Hudson, 33
Journal, meteorological, kept at Deerfield, Mass. 333

K.

Kendall, Thomas, Mr. his new graduating instrument, 398
Kennedy, Alexander, Doct. his notice of working and polishing granite in India, 246
Kutch, Earthquake at, 315
Kuhaewski, M. his new machine, 387

L.

Lancasterian schools in France, 389
Lamp, aphlogistic, 328
Lava and puzzolana, 371
Lead, sulphate of, 55—Lead ores, new species of, 28
Leffingwell, Wm. Mr. on fluor spar, 51
Lehigh or Wilkesbarre coal, practical facts relating to, 8
Leipsic fair, 392
Letter on the cause of heat, 142
Letters, original, of Doct. Franklin, 357
Lime and mortar, extract from a French work on, 373
Limestone, dove-coloured, of Lake George, 44
List of plants growing in Litchfield and its vicinity, 292
Litchfield, plants of, 69
Lithographic art, notice of, 169
Lithographic, printing of MSS. 197
Lydian stone, 43

M.

Magnesite of Hoboken, 18
Manganese of Wilkesbarre, 38—Of Hillsdale N. Y. 54, black Oxide of, 189
Manufacture of the Italian bonnets, 166
Manufactory of Apprentices, 379
Marble beds of—in Berkshire Mass. 40
Marmolite, 19
Means of detaching painting in Fresco, 384
Medical Quackery, 390
Memoir on navigable Canals, 102
Meteorological table, 333—Journal kept at Deerfield Mass. 333
Mica Prismatic locality of, 37

Miller, Caleb, Mr. on the use of Phosphoric Acid in Jaundice, 162
Mineralogy, foreign—notices in, by Dr. Webster, 25—American, notices in, 33—Min. and Geol. foreign, notices in, 243
Minerological and Geological notice, 188
Minerals, near Providence—notice of, 284
Miscellaneous notices in American Min. and Geol. 274
Mitchill, Samuel, Doctr.—his letter on the Proteus of the American Lakes, 181—Mus Bursarius, or pouched Rat of Canada, 183
Molybdenum, analysis of, 320
Monument to Copernicus, 387
Morbid animal products, chemical examination of, by Professor Dana, 149
Morse, his new Gazetteer, 190—new school Geography and Atlas, 191—Morse, S. F. B. his notice of Satin Spar, 44
Mountains of Lake George, 48—Groupes and Ridges, 42
Munich, public instruction in, 196
Museum of the Vatican at Rome, 380
Myology of the human body, by M. Ameline, 198
M. Bonpland, his Botanical Garden at Buenos Ayres, 197

N

Natural Ice houses, 174
Natural History, 198—372—in France, 381
Nemalite, or Amianthoid Magnesite, 19
New system of Mineralogy, 245—diplomatic, cypher, 377—Mineral, 377—Mathematical instrument, 377—Machine—Graduating instrument, 398—new blowpipe of Prof. Green, 164
Niagara, Geology and Mineralogy of its vicinity, 35
Niger, the River, 373
Nishgerod, in Russia fair of 393
Notice of the Lithographic art, 169—of the tempest of September 3d, 1821—Editor, p. 171—of Morses new Gazetteer, 190—Geography and Atlas, 191—Minerological and Geological 188—of the working and polishing granite in India, 246—of vegetable fossils in coal formations, 266
Nuttall, Mr. Thomas, on the serpentine rocks of Hoboken and the minerals which they contain, 16

O

Ochres of Vermont, 24
Organic remains, 386
Organized remains, researches on, 395
Original letters of Doctr. Franklin, 357
Oxid of Titanium Silico calcareous, 276

P

Paris, statistical notices of, 376
Pearson's domestic Telegraph, 314
Pennatule Flèche, 87

Pepper, analysis of, 390
Petrefactions, new works on, 31
Philology, 379
Pisa, 383
Plants of the North West, description of, 56
Plants of Litchfield, catalogue of, 69—growing there, 292
Platina, wire used for, a permanent lamp wick, 328—Platina extraordinary mass of, 28
Pompeia, 384—Potatoe, 195
Porter, Jacob, Doctr. localities, 55—Porter T. D. Doctr. on tests for the discovery of Arsenic, 160
Premiums for National Industry, 192—for Mechanical Arts, 192 Chemical Arts, 192—fabrication of Russian leather—193—Economical Arts, 193—transferred to the years 1821—1822, 194
Princess Ann Narischkin, her legacy, 386
Proteus of the North American lakes, description of, 181

Q.

Quartz, crystals of, in the Island of Lake George, 44
Quartz, rose of, Southbury, Connecticut, 54

R.

Rain, remarkable fall of, (see Catskill storm passim,) 125
Razors, M. Merrimée, 199
Remedy for Drunkenness, 385
Rock crystals, with water, 27
Royal Medical Society in France, 378
Russia, births and deaths, 389

S.

Sands of Lake George, 46
Schoolcraft, Henry R. Mr. his account of a Fossil tree on the river des Plaines, 285
Schools of mutual instruction, 199
Scientific Journey, by Mr. Seiber of Bohemia, by Professor Rask, of Copenhagen, &c. 383
Sculpture, 197—389—371
Seal, Thomas Mr. on beryl, 39
Sections of the Wilkesbarre Coal Mines, 5
Serpentine Rocks of Hoboken, 16—Chemical characters of, 18
Seybert, Henry, Dr. his analysis of Sulphuret of Molybdenum, 320
Shetland Islands, minerals of 25
Shorl of Saratoga, 37
Singular explosion 400
Slate siliceous, 43
Society, American Geological, 191—literary of Antwerp, 380
Spar satin, 44—calcareous crystalized at Bakers Falls, 43—calcareous, crystals of, from Lake George, 44

Steam boats, 377—Engine alternating, 90
Steatile crystalized, 274
Steel, John H. Doctr. on chrysoberyl, 37
Steel, 376
Storm, remarkable, at Catskill, account of 125
Strontian, sulphate of,—of Lake Erie and the Detroit river, notitices of, 279—80—from Erie Analysis of, 324—in sulphate of Barytes, 327
St. Michael, Island of, description of, and its Geological structure, 251
Survey, Geological of the county of Rensselaer in the State of New York, 189
Sus scrofa, anecdote of, 309

T.

Talc foliated of Vermont, 54
Tantalite of Haddam, 52
Tea, 377
Telegraph, improved, domestic, 314
Ticonderoga, walls of, 49
Titanium, red oxid of, 53
Torry, John, Doct. on the plants of the North West, 56
Tourmalin, black, Plainfield, 55
Trisection on the Curves of, 343
Tropical rains, 375
Tungsten, yellow, oxide of 52—Massive, 187

U.

Use of phosphoric acid in Jaundice, 162

V.

Vaccination a remedy for the plague, 196
Vienna, 197
Volcanoes and volcanic substances, Dr. Cooper on, 205

W.

Ward's alternating steam engine, 90
Waters of Lake George, their transparency and purity, 46—causes of, 46
Webb, Thomas H. Mr. on fluor spar, 50—his notice of the minerals near Providence, 284
Webster, J. W. Doct. his foreign notices in mineralogy, 25—in mineralogy, geology and the ancient arts—243—his description of the Island of St. Michael and its geological structure, 251
Wolf, anecdote of, 310
Wyoming, description of the valley of, 4

Z.

Zeal for science, 388
Zoiste, 276
